SUMMARY

Frontend Developer with 2 years of experience building scalable web apps using Vue.js, Nuxt.js, Next.js, TypeScript, and Tailwind CSS. Delivered enterprise transport and e-learning platforms serving 15,000+ users across 250+ organizations, with expertise in responsive UI, role-based systems, and real-time dashboards.

CORE SKILLS

Frontend: JavaScript, TypeScript, Vue.js, Nuxt.js (3 & 4), React.js, Next.js, Pinia, Tailwind CSS, Nuxt UI, GSAP, Framer Motion

Tools & Integrations: RESTful APIs, Socket.io, ECharts, Git, GitHub, AdonisJS, MySQL

Specialized: Internationalization (i18n) & RTL Support, Role-based UI systems, Optimistic UI

EXPERIENCE

Bitlogicx

Frontend Developer

Lahore, Pakistan

Aug 2024 – Present

- Led frontend development for two enterprise platforms serving international clients, including a national transport management system (OPAL) and a government-backed training platform (OLA TMS), supporting **15,000+ active users across 250+ organizations**.

OLA TMS — Oman Logistics Association Training Management System

Apr 2025 – Jan 2026

- Designed and led frontend architecture for a greenfield Nuxt 4 + Vue 3 SPA (Oman national logistics platform), building scalable UI systems from scratch for **250+ organizations and 15,000+ active users**.
- Implemented a **6-role permission system** (admin, organization, candidate, trainer, staff, developer) with dynamic navigation, conditional rendering, and permission-based actions across the application.
- Engineered **multi-level approval workflows** across 6+ entity types with **Pinia state management**, including status tracking, assignable approvers, and history logs.
- Built end-to-end business flows including **payment system** (redirect handling, invoices, proof upload), **support ticket system** (priority pipelines, optimistic updates, PDF export), and handling **8,000+ enrollments**.
- Developed analytics dashboards (9+ ECharts visualizations) and implemented **internationalization (i18n) with RTL support**, ensuring fully dynamic language switching across all UI layers.

Technologies: Nuxt 4, Vue 3, TypeScript, Pinia, Tailwind CSS, ECharts, Framer Motion, RESTful APIs

OPAL STMS (Smart Transport Management System)

Aug 2024 – Apr 2025

- Led frontend development for a **brownfield Nuxt 3 migration**, delivering scalable **Vue 3 + TypeScript architecture** in collaboration with a senior full-stack engineer.
- Architected a **19-module frontend system** covering live tracking, geofencing, KML integration, violations, and 13 custom **ECharts-based reporting modules**.
- Built a real-time Socket.io dashboard for live vehicle and driver monitoring while standardizing API modules and composable architecture, improving code consistency and reducing boilerplate by 40%.
- Implemented full **internationalization (i18n) with bilingual EN/AR RTL support**, achieving **high translation coverage** for enterprise deployment in Arabic markets.

Technologies: Nuxt.js 3, Nuxt UI, TypeScript, Tailwind CSS, Socket.io, ECharts, Framer Motion, RESTful APIs

EDUCATION

Bachelor of Science in Computer Science

2019 - 2024

from Virtual University of Pakistan.
